1. The following is an examiner's statement of reasons for allowance: The claims have been allowed because claims 1 and 17 recite a tissue container or a blank for a tissue container having a first section, second section, third section and a forth section. There is a tab portion connected to a third end of the forth section decorative portion. The tab portion secures in overlapping fashion the forth section decorative portion to the first section decorative portion. Claim 7 recites a tissue container having a top face and a bottom face each having a plurality of bottom face portions. The top face portions creates a facial tissue opening. There are a plurality of side faces in continuity with the top and bottom face. The plural side faces create a continuous decorative surface that extends in side fold continuity across the side faces except at a facial tissue container side interface formed between two of the plural side faces..
2. Long is cited showing a decorative surface 5 but not having plural side faces.
3. Cohen et al is cited showing in figure 1 a decorative surface also not having plural side faces and not having a top opening.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
